Wood blinds

Roller — Monomer in Off White

Honeycomb — Cyprus in Linen

Wood Blinds in Arctic White

The benefits of Sivoia QS Triathlon solutions

Convenience. Comfort. Control.

Create your comfort zone™

- Shades move in near perfect unison to control the natural light in your space
- Effortlessly adjust shades and blinds with your voice, Pico smart remote, the Lutron app, or a keypad
- Enjoy instant privacy any time you need, any way you want
- Refined daylight control with the Lutron app reduces harsh glare, minimizes fading, and maximizes comfort*

Enhance your décor

- Choose from our versatile and timeless collection of fabrics with hundreds of styles
- Find shades that add a touch of luxury and complement your personal style
- Embrace our handpicked range of natural colors in cool to warm tones and subtle, decorative textures
- Know you're getting the highest quality, most durable fabrics
- Experience precise movement that delivers a clean, aligned look year after year

Add peace of mind

- Enjoy effortless privacy by closing shades with your voice, Pico smart remote, or on a schedule with the Lutron app
- Create a morning comfort zone by scheduling shades to rise when you do
- Schedule shades to close at sunset to experience more family time at the dinner table

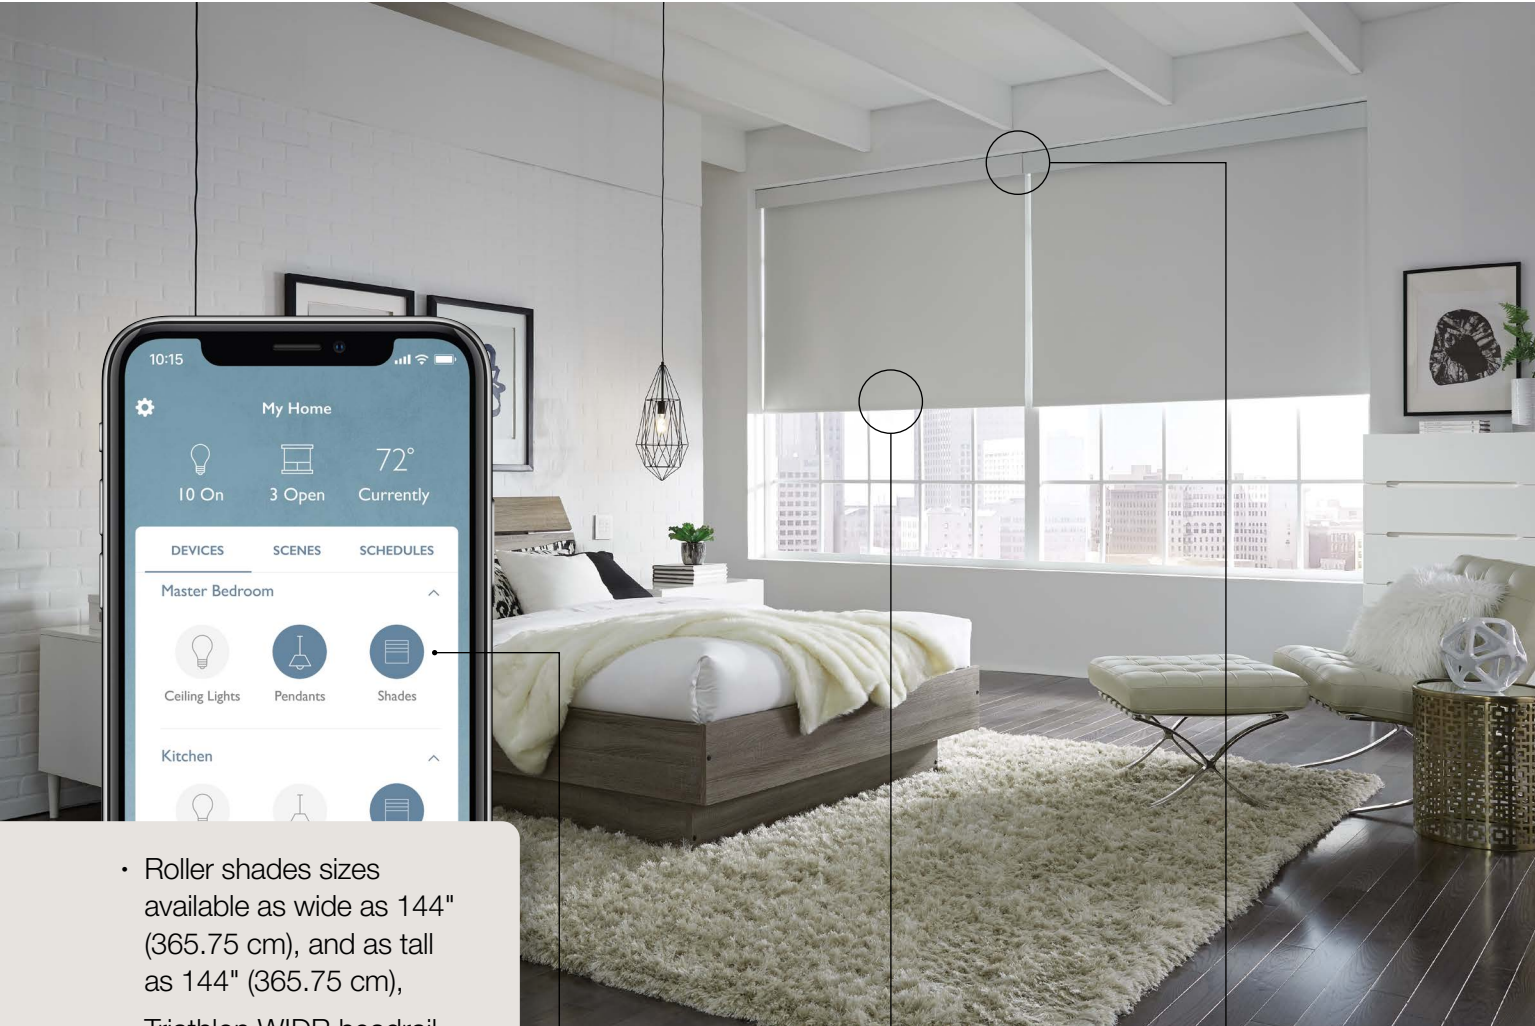

Integrate seamlessly

- Integrates with Lutron systems for whole-home control solutions
- Control shades, lights, and more with a keypad, timeclock, third-party integration, or the Lutron app
- Works with most smart home brands including Amazon and Google
- Sync with other smart home products so you can set the lights, temperature, and music all in one place

* Natural Light Optimization feature not available for HomeWorks

Sivoia QS Triathlon roller shades

Functionality meets aesthetics

- Roller shades sizes available as wide as 144" (365.75 cm), and as tall as 144" (365.75 cm),
- Triathlon WIDR headrail accommodates large-sized shades (shades greater than 8' wide)
- Power with store-bought D-cell batteries or plug in to a nearby outlet
- Battery Boost is available to extend battery life up to 80% or up to 6 years

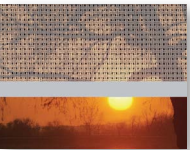

Control your shades with the **Lutron App**, a Pico smart remote, keypad, or a voice assistant

Choose from a variety of hembar styles. Here, our designer hembar offers a clean aesthetic

Choose the top treatment option that meets your style needs

Fabric options

Shades are available in a wide variety of fabric colors and textures. Choose from sheer, translucent, and blackout fabrics.

Sheer

- Open weaves preserve views to outside and filter sunlight
- Ideal for rooms where you don't need complete privacy

Translucent

- Tighter weaves transform harsh daylight into a soft, filtered glow
- Provides increased privacy for spaces like bathrooms

Blackout

- Opaque fabrics block light from entering the space
- Ideal for bedrooms and media rooms for complete privacy

Top treatment options

Sivoia QS Triathlon shades are available with three different top treatment options to tailor the solution for any space. Each option is available in standard or WIDR to ensure a consistent aesthetic.

Architectural Fascia

Fabric-Wrapped Fascia

Exposed Headrail

Exposed WIDR Headrail

Innovative headrail design

Innovative headrail simply tips forward to reveal the battery tray — without taking the shade down.

Tip down the headrail.

Change the batteries and snap the headrail back in place.

Sivoia QS Triathlon wood blinds

Handcrafted elegance

- Single blinds are available from 20”- 72” wide and as tall as 72”
- Two blinds under one valance are available from 40”- 96” wide and as tall as 72”
- 2” Slat Wood Blinds with automated slat tilt adjustment and cordless manual lift

Control your shades with the Lutron App, a **Pico smart remote**, keypad, or a voice assistant*

Carefully designed bottom bar makes it easy to manually lift/lower blinds

Choose the valance option that meets your style needs

Finish options

Blinds are hand-crafted from genuine North American Basswood. Available in 12 stained and 6 painted finishes to complement any interior.

Valance styles

Manual and Automated Tilt-Only:

Easton

Morgan

Innovative headrail design

Innovative headrail simply tips forward to reveal the battery tray — without taking the blind down.

Slide the valance down to reveal battery tray.

Change the batteries and slide the valance back in place.

* Not available with Apple HomeKit or Siri

Sivoia QS Triathlon insulating honeycomb shades

Stylish and energy saving

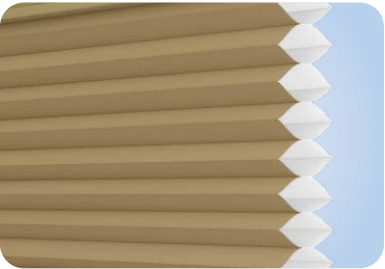

- Insulating honeycomb shades available up to 96" wide x 96" tall
- Uses store-bought batteries
- Plug-in power options also available

Control your shades with the Lutron App, a Pico smart remote, keypad, or a **voice assistant**

Color-matched headrails; leave exposed or pair with your own top treatment

Fabric options

Shades are available in different light transmittance options, as well as a variety of colors and textures.

Light-Filtering Single Cell
Fabrics that allow daylight to transmit through the shade, but limit views to the outside.

Light-Filtering Double Cell
Fabrics transform harsh daylight into a soft, filtered glow. Saves even more energy with double-cell insulating design.

Room-Darkening
Fabrics that utilize a room darkening lining to eliminate light transmission through the shade and block views to the outside. Available in single-cell style.

Patented headrail design

Our exclusive Tap n' Tilt technology makes changing the batteries a breeze, without ever removing the shades.

Simply press the release buttons, allowing the headrail to tilt forward.

Change the batteries and snap the headrail back in place.

Sivoia QS Triathlon shade control options

Whole-home solutions or shade-only

Whole-home control solutions

Sivoia QS Triathlon shades integrate with Lutron Caséta*, RA2 Select, RadioRA 2, and HomeWorks QS lighting systems. With a lighting system, you can control your shades from a keypad, through a timeclock, from your mobile device, or third-party integration.

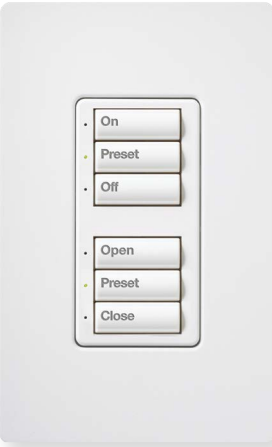

Keypads and single-room scene controls

You can control system-integrated shades from wall-mounted or tabletop keypads or controls.

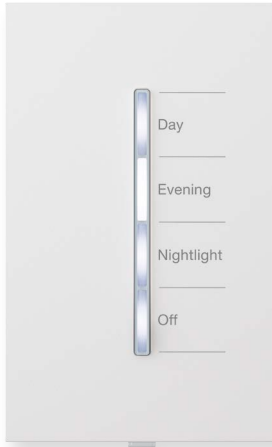

With one button press, you can dim your lights, adjust the temperature and turn on/off standby power to small appliances, creating an environment that’s both comfortable and energy-efficient.

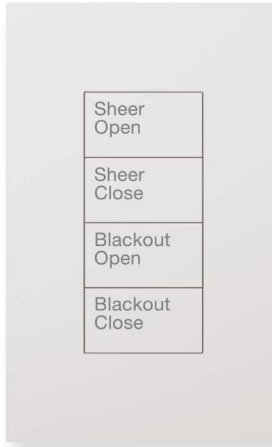

Pico scene keypads
Works with any residential system

seeTouch keypads
Works with RadioRA 2 and HomeWorks QS systems

GRAFIK T keypads
Works with RadioRA 2 and HomeWorks QS systems

Palladiom keypads
Works with HomeWorks QS systems

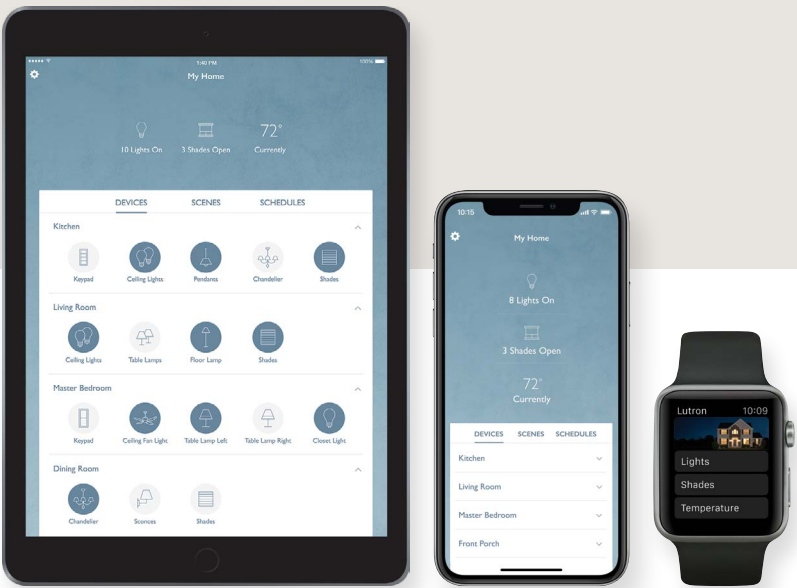

Timeclocks

A timeclock works in conjunction with a home-control system to automatically raise or lower your shades based on programmed times.

* Smart Bridge PRO required for Caséta integration.

Mobile devices

If you have a Lutron home system, you can control your shades from your mobile device with a Lutron app — as well as lights, temperature, music, and standby power to small appliances — even when you’re away from home.

Works with both Android™ and iOS devices.

Third-party integration

Shade control (as well as lights) can be integrated with other manufacturers’ systems, such as audio/visual, for another level of control.

				AUTONOMIC
			Crestron Electronics, Inc.	
SAVANT				

Shade-only solution

Pico wireless controls —

You can mount this flexible, battery-operated control on a tabletop pedestal or to a wall (without cutting holes or running wire).

Flexible options

Sivoia QS Triathlon shades can be powered by batteries, plug-in power supplies, or power panels. Coordinating manual shades are also available.

Batteries
Batteries are a cost-effective option that guarantee easy maintenance. Battery-powered shades are the best choice for applications that require a wire-free solution (such as French doors), making these shades ideal for any phase of the construction or renovation process.

Plug-in power supply
A plug-in power supply is convenient when shades are installed in a hard-to-reach area, making it difficult to change the batteries.

Power panels
A power panel can be used to power up to 10 shades, and is ideal for installations during renovation or new construction. Shades are wired directly to the panel and don't use batteries.

Cordless manual options
Manual options are available to coordinate with all of your automated window treatments.

Sivoia QS Triathlon

Superior system shading designed to outperform

Simple power options

Instant digital response

Precision hybrid drive

Synergistic performance

Simple power options — Makes installing shades easy and affordable — even if you can't pull wires.

Instant digital response — Immediate reliable response to RF system commands, even with battery-powered shades. Shade returns to Eco mode when not in use to preserve power and minimize vampire loads.

Precision hybrid drive — Combines low power requirements with stored energy to move shade while maintaining precision alignment for superior aesthetics.

Synergistic performance — Triathlon combines these three elements to deliver the most reliable, power-efficient shading system available today.

The Lutron Difference

When you choose Lutron, you're choosing a manufacturer with a history of innovation — and the leader in the automated shading category since 2003. So when you purchase our Sivoia QS Triathlon shades you can be confident you're getting a quality product, backed by our commitment to reliability (we offer 24/7 customer support).
