# RA2 Select

Whole home lighting control made simple

☼LUTRON

Complete your home with a RA2 Select system.

Personalized smart lighting, shade, and temperature control for any home, any budget.

Added convenience. More comfort. Staying in touch with your home, even when you're not there.

Download the free Lutron App to monitor and adjust lights, shades, and temperature on your smart device, whether you're home or away.

Install Automation Ltd

Welcome home

Schedule exterior lights to turn on before you walk into your home at the end of your work day.

Then turn on entry lights with the "Home" button to illuminate a path from your front door.

Heading out? The "Away" button ensures you'll never leave the lights on.

Transform a room

Easily set multiple lights and shades to just the right levels for cooking, a quiet dinner, or cleaning up.

	Ceiling lights	Island lights	Pendant	Shades
Bright	100%	100%	100%	Open
Cooking	100%	100%	50%	75% Open
Dining	20%	65%	50%	Half Open
Off	Off	Off	Off	Closed

Entertain and relax

Create the perfect atmosphere for entertaining friends with light, shade, and audio control at your fingertips, or watch your favorite movie without glare. Conveniently close shades and turn lights off as the opening credits start to roll.

Control where you want it
Mount a Pico control to a wall without cutting a hole or wiring anything.

A designer-style wallplate adds a finishing touch to a wall-mounted Pico control.

Unwind or get ready
Enjoy your night or morning routine in the perfect light.

Allow your eyes to relax in the evening and gradually adjust in the morning.

Lights automatically turn off when you leave the room.

That way, you'll never have to worry about accidentally leaving them on.

Rest assured

Use the "Goodnight" button to turn lights off and lower shades in other rooms of your home, from the comfort of your bed. Hear a noise in the night? Turn hallway lights on and raise living room shades with the "Alert" button.

And if you're a night owl but your partner isn't, use the Pico control to separately dim the lamp on your side of the bed.
Control where you want it
Mount a Pico control on a tabletop pedestal. Tabletop pedestals are available in single, double, and triple configurations.

System components

When you choose a RA2 Select system, you're selecting smart home technology comprised of keypads, light controls, fan controls, temperature controls, appliance controls, and shades.
The RA2 Select offering was developed so you can choose the specific components you want in order to create the system that will best suit your lifestyle.

Lutron App and main repeater

The main repeater lets you control your lights and shades from a smartphone or tablet using the free Lutron App. It also enables system integration with other leading brands (see page 21).

If you need to expand the wireless range of your system, you can add a wireless repeater to enjoy control throughout your home.

))) Pico scene keypads

Entry	Bedside	Kitchen	Family Room	Any Room

Scene keypads are available engraved with common scenes, for typical activities in your home. They automatically configure for the room type and type of fixtures in the room.

You can also customize a Pico keypad with scenes you create to suit your lifestyle. And you can easily change scenes whenever you want.
Lights	Shades	Audio	Fans

))) Pico remote controls

Pico remote controls are great for controlling lights, shades, audio, and fans individually, from anywhere throughout your home.

System components

💡 Maestro dimmers and switches

Install in place of standard switches for dimming or switching control of the attached lighting, as well as system control from a Pico scene keypad.

✖ Maestro fan control

Control a ceiling fan without the hassle of pull chains.
((•)) Occupancy/Vacancy Sensors

Radio Powr Savr occupancy/vacancy sensors automatically turn lights on when you walk into a room and off when you leave. Available in ceiling-, corner-, and hallway-mount options, for the right amount of coverage in any room.

🌡 Lutron wireless thermostat

Adjust heating or cooling from anywhere using your smartphone or tablet.

🛋 Plug-in and tabletop lamp dimmers

Plug into a lamp/standard receptacle for dimming control, from either a tabletop control or Pico scene keypad.

## 🖥 Plug-in appliance module

Plugs into a standard receptacle for control from a Pico scene keypad. Shuts off standby power to electronic appliances, such as computer monitors, when they're not in use.
USB Receptacle   Phone Jack   Cable Jack   Wallplate

Accessories

Coordinating receptacles, phone jacks, cable jacks, wallplates, and more.

System components

Automated shades

Automated shades are great for any room in your home, including areas with hard-to-reach windows, such as foyer windows. They provide privacy when you need it and keep the sun out or let it in, so your HVAC system doesn't have to work as hard.

Lutron automated shades move quietly, in unison, and are available in three styles with an extensive selection of fabrics.

Roller shades

Roller shades complement both traditional and contemporary designs and are available in different sizes to accommodate the needs of any room.

Battery-powered options are available.

Honeycomb shades

Honeycomb shades add luxury to a space with their elegant textures, as well as depth, thanks to their cellular design — which also provides superior insulation.

Battery-powered options are available.

Wood blinds

Elegant wood blinds provide privacy while allowing natural light to filter into a space. Use Lutron wood blinds to precisely align lift and tilt positions across multiple blinds. Affordable automated tilt with manual lift is also available.

Battery-powered options are available.

Horizontal sheer blinds

Horizontal sheer blinds pair the soft elegance of a sheer with the precise control of a blind. Sheer layers also offer privacy, even when vanes are open.

Drapery systems

Choose from elegant pinch pleat or ripplefold styles, as well as drapery that moves up from bottom to top.

Shades are adjusted with a Pico control, or integrated into a whole-home control system.

Smart home made simple

A RA2 Select system makes it easy to turn your home into a smart home. Build its foundation around these key features:

Scheduling — you can program lights and shades to automatically adjust at set times of day.
Geofencing — controls lights based on your location.

This feature can turn lights on for you when you arrive home and notify you if you've left lights on when you leave.

Smart Away — randomly turns lights on and off in the evening, so it looks like you're home, even when you're not.

RA2 Select systems also work with smart home solutions from other best-in-class brands. Expand your system to add even more convenience to your day-to-day:

Amazon Alexa
Create just the right light — or control a ceiling fan — using Alexa voice control. Ask Alexa to turn lights on, off, or dim them to your favorite level, or to turn a fan on or off.

Apple® HomeKit™
The RA2 Select main repeater contains Apple HomeKit technology, so you can use Siri® to control your lights and shades.

The Google® Assistant
Control lights, shades, and ceiling fans with just your voice.

Honeywell Wi-Fi Thermostats
Choose from a wide variety of thermostat options to control the temperature in your home, from anywhere. Compatible with all Honeywell Wi-Fi thermostats, including Lyric Round and T Series.

Logitech Harmony
Dim lights, lower shades, and start a movie with one button press on Logitech Harmony hub-based remote controls or from the Harmony app.

Samsung SmartThings
Control lights and shades from the Samsung SmartThings app, and create new routines to tie in other smart devices like locks, sensors, cameras, and more.

Sonos
Control your Sonos Home Sound System from a Pico remote control for audio or from scenes in the Lutron App. You can also control your lights using your voice via the Sonos One with Amazon Alexa.
